THE SONOBED POPPY ~ BREAST IMAGING

STANDARD FEATURES

- Double 13" x 13" POWER Wedge Sections™ operate with supplied hand control
- Built-in patient positioning wedges (right & left) lift & lower for optimal breast placement
- Electric Fowler positioning (back)
- Electric height adjustable from 26" - 38"
- Hand control for electronic functions
- 5" Individually locking casters
- 600 lbs LIFT capacity — 900 lbs LOAD capacity

RECOMMENDED ERGONOMIC OPTIONS

- Ultra-Low Column lowers the bed to 19" and raises to 38". Ideal for wheelchair transfer height making it easier for the patient to enter and exiting the bed
- Foot Control(s) to run all electric features frees up your hands & easy to use in a dark room
- Ergo Rails side rails - swing down and lock under the bed frame, leaving space for sonographer's knees
- Central Locking Casters - quick and easy to use with one pedal, lock/unlock all the casters at once
- Head Rails - 2 styles to choose from. Head rails help the patient position themselves, saving the sonographer from lifting and assisting them into place

It takes one to know one.

A bit about us...the Stasney team.

SonoBed™s are custom designed and hand crafted by registered Sonographer Jason Stasney RVT, RDCS.

Angela Stasney teaches sonographers the importance of ergonomics and how equipment choices, along with simple daily exercise, can further their careers.

You can easily reach us any time at **888.256.8748**.
